

Public Service Electric and Gas Company
PSE&G Electric Delivery
4000 Hadley Road
South Plainfield, NJ 07080

December 8, 2022

Dear Valued Customer,

PSE&G is currently conducting statewide electric reliability improvements to upgrade its utility infrastructure. These projects include work in existing stations, construction of new stations, and the replacement of aging equipment at these sites.

Beginning on or around Monday, December 12, 2022, PSE&G will begin preconstruction activities at the site of the new Rancocas Switching Station located at 130 Hartford Road in Delran Township. The new station will enhance the electric transmission system's reliability, while helping to ensure safe electrical service to residents, businesses and civic facilities in Delran Township and the neighboring communities.

The initial phase of activity includes; site cleanup and grading, and tree clearing near the property. Beginning in Q1 2023 the house at 130 Hartford Road will be demolished. Work hours will be between 7 a.m. and 5 p.m., Monday through Friday. During construction, there will be some unavoidable noise and potential for vibrations from the site. PSE&G will monitor all activities to ensure this work remains within acceptable limits and will work to minimize adverse impacts to the area. The duration of this phase of work is four weeks, weather permitting. Please note: PSE&G does not expect this project to cause any service interruptions.

Because customers like you rely on electric and gas to power their daily lives, PSE&G is considered an essential service. As we continue this critical work to keep the power system safe and reliable, we are taking prudent measures and maintaining safety as our number one priority. It is essential that you and anyone using your property, including children and pets, refrain from going near our active work site. PSE&G is coordinating with the local police department to minimize any inconvenience.

In light of the COVID-19 pandemic, and in the interest of maintaining the safety of our customers, our employees, and their families, PSE&G workers and PSE&G contractors follow safety guidelines put into place by the CDC and NJ State Department of Health, as well as all directives from the Governor's Office and county/municipal governments. This includes that our workers practice social distancing and we ask that you also maintain a safe distance from our crews. PSE&G will not need to enter your home or business as a result of this work.

If you have any questions about the station project, please call us at 1-800-606-0045. We appreciate your patience and cooperation as we improve electric service reliability for your neighborhood and the region.

Sincerely,
PSE&G Public Affairs
