DELRAN TOWNSHIP SEWER DEPARTMENT
EXECUTIVE DIRECTOR OF OPERATIONS/SEWER PLANT SUPERINTENDENT

Delran Township seeks a highly motivated individual that has strong interpersonal skills to fill the Executive Director of Operations/Sewer Plant Superintendent position for the Sewer Department. Candidate must have substantial experience with the operation and management of comparable public or municipal facilities. Candidate must have excellent written, communication and computer skills. This position requires a minimum of a NJDEP S-3 and C-3 Operator License.

The Township operates a 2.5 MGD wastewater treatment plant with biological nutrient removal (BNR). The wastewater treatment plant process includes screenings, grit removal, three BNR reactors, disc filters and ultraviolet disinfection system. The plant effluent is pumped to the plant outfall in the channel of the Rancocas Creek. Liquid sewage sludge generated by the treatment process is transferred to a sludge thickener and belt filter press. The dried sludge is then transported off-site for disposal. The Collection System consists of approximately 64 miles of sanitary sewers, 9 pumping stations of varying sizes and approximately 4 miles of force mains.

Please email your resume to Township Administrator, Jamey Eggers at jeggers@delrantownship.org. Full-time Salary range $95,000 to $125,000. Part-time applicants will be considered.

Closing Date: November 30, 2026
